LeakMaster Pool Repair Epoxy Putty	Hand-moldable epoxy with two parts in one stick.	Single stick format, works underwater, good adhesiveness, minimal water clouding	Inflexible once cured	20—60 minutes	White	Cracks in skimmers, concrete pool shells, and lights   
LeakMaster Quick Set Epoxy Putty	Fast curing, hand-moldable epoxy with two parts in one stick.	Fast cure time, single stick format, works underwater, good adhesiveness, minimal water clouding	Have to work fast, inflexible once cured	5 minutes	Off-white	Cracks in skimmers, concrete pool shells, and lights   
A + B Epoxy Putty	Two-part, hand-moldable epoxy.	Smoothes and feathers nicely, minimal water clouding, works underwater, color options	Parts packaged separately, inflexible once cured	40—60 minutes	White, Black, Grey, Tan	Plaster cracks, skimmers, lights   
LeakMaster Butyl Tape	Rubber gap filler that remains moldable.	Great filler, remains flexible, can be removed	Gap filler only, not an adhesive	N/A	Black	Light conduits, gaskets, larger cracks  
LeakMaster Flexible Sealer	Flexible, rubber based sealant that bonds to almost any pool surface.	Strong adhesion, flexible, works underwater	Shrinks a little as it cures	Depends on thickness	White or Light Blue	Vinyl patching, gaskets 
LeakMaster Peel and Stick Vinyl Patches	Pre-cut adhesive vinyl patches.	No glue, no mess, fast application, clear	Not great on corners or wrinkles	N/A	Clear	Vinyl patching 
LeakMaster Pool Glue	Two-part glue that cures hard but retains some flexibility.	Aggressive adhesion, remains more flexible than epoxies	Requires additional tools (gun and mixer tips)	30—45 minutes	White	Skimmers (w/ fiberglass mesh), PVC, ABS, fiberglass   
Boxer Glue	Underwater vinyl adhesive.	Strong adhesive for vinyl patches, works underwater	Glue floats and can get stuck in hair when patching	15—20 minutes	N/A	Vinyl patching 
HH-66 Glue	Fast-drying vinyl adhesive.	Strong adhesion on vinyl, cures fast	Doesn't work well underwater	3-5 minutes	N/A	Vinyl patching (dry) 
Plast-Aid	Two-part compound that cures to a hard, durable, and waterproof plastic.	Bonds to a variety of plastics including PVC, acrylic, and polycarbonate, can be colored	Not good for larger applications	15 minutes	Semi-clear	Acrylic spas, PVC, fiberglass stairs  
Mr. Sticky's Underwater Glue	Two-part underwater glue that bonds to a variety of materials.	Strong bond, packaging makes mixing easy, works underwater	Sags a little, long cure time, yellows over time	24 hours	Yellow	Tile, PVC, fiberglass stairs
